

Name _____

Shape Up!

Read the description. Then draw the shape. If the shape cannot be drawn, write the word *impossible*.

1. a ray with two endpoints

2. a closed shape with 6 line segments

3. a part of a line with two endpoints

4. an open triangle

5. an open shape with 7 line segments

6. a closed shape with 3 line segments and a curved path

7. **Write Math** Nick says we cannot see any true lines in the real world. He thinks everything we call a *line* is really a line segment. Do you agree or disagree? **Explain.**
