

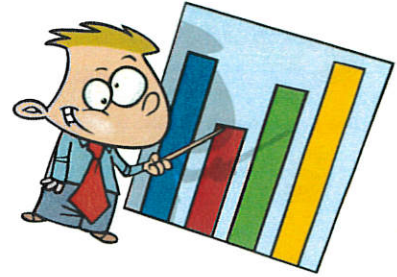

Graphing Ethnic Backgrounds

Directions:

1. Create a bar graph that displays the ethnic backgrounds in our class period using the Kids'Zone graph creator.
2. An easy way to find the web site is to Google search "create a graph." It will be your first result.
3. Below are the items that need to be entered in and the steps to take, in order. Be sure to only enter items from the list. Every other field should remain empty.

Bar Graph

DESIGN Tab

Grid Color: You may change this to any color you wish

DATA Tab

Graph Title: Give the graph an appropriate title

X Axis Label: Give the X Axis an appropriate title

Y Axis Label: Give the Y Axis an appropriate title

Source: Your Name

Data Set: ITEMS - Count your items. The items are the ethnic backgrounds in our class.

GROUPS - Groups value will be 1

Enter your Ethnic Backgrounds as Item Labels and their value.

Bar Color ... select one color OR select white if you want to do the extra credit, which is to draw the national flag as the bar color

LABELS Tab

This is formatting and can be skipped or adjusted if you have time. You should only change the font.

Preview Tab

You should preview your work and make any changes necessary.

Print/Save Tab

Select print. In the new window, you should notice format is already set to .pdf. Select print again.

Another new window will open up and you should save this to Notability...new note. Once you have it in Notability, send it to mrwallace@markupsync.com
