

Lesson 6 ~ Adding and Subtracting Decimals

Name _____ Period _____ Date _____

Find each sum or difference.

1. $9.3 - 4.7$

2. $6.35 + 2.7$

3. $5.81 + 0.83$

4. $19 - 6.4$

5. $11.091 + 2.24$

6. $3 - 1.79$

7. $4.32 - 2.778$

8. $115.9 + 12.04$

9. $10.51 - 2.37$

10. $0.9 + 0.038$

11. Hans and Ivan went out to lunch. Hans' sandwich cost \$5.78 and Ivan's meal cost \$6.29.

a. What was the total amount of the bill?

b. If Hans gave the cashier \$15, how much change did he get back?

12. Nathan ran 19.35 miles during the first week of cross-country practice. In the second week, he ran 22.8 miles. In the third week he ran 25 miles.

a. How far did he run in the first three weeks of practice?

b. Nathan wants to run a total of 100 miles before their first race. How many more miles does he need to run?

13. The Community Club collected cans as a fundraiser. Each week, they exchanged the cans collected for cash at the grocery store.

a. What was the difference between their highest week of earnings and their lowest week of earnings?

Week	Earnings
1	\$11.75
2	\$12
3	\$20.30
4	\$21.65

b. How much did they make during the four-week fundraiser?
