

Film Ticket Sales

The manager needs to calculate cinema ticket sales.

Enter a formula to calculate Adult ticket sales.

Adult ticket sales is **Number of adults** multiplied by **Adult ticket price**.

Enter a formula to calculate Child ticket sales.

Child ticket sales is **Number of children** multiplied by **Child ticket price**.

Enter a formula to calculate the **Total ticket sales** for each film.

Sort the Total ticket sale into descending order.

Format the spreadsheet and data appropriately.

Create a chart to show the Total ticket sale for each film.

Make sure your work is clear, easy to read and formatted appropriately.

You must print out the finished spreadsheet and the chart.

You must also print out the spreadsheet showing the formulas you have used.

Evidence needed:

- a) *A printout of the spreadsheet and chart*
- b) *A printout of the spreadsheet showing the formulas used.*
