

How did I do today?

Level 5	I understand the days objectives and I am confident that I can apply them today and in the future.	Continue to read your text, do all assignments fully & honestly and be actively engaged in class.
Level 4	I understand the objectives and I can apply them to today's activities.	Read and take notes. Review notes. Work to develop greater understanding & commit the new information to long term memory.
Level 3	I know what the objectives are, I have a general understanding of the lesson, but there are areas I am confused about.	Review notes. Read the same material in your text and return to class tomorrow with specific questions so I can re-teach what you need.
Level 2	I vaguely know what the objectives are. I have a vague understanding of the lesson.	Begin copying the objective down daily prior to taking notes. Ask and answer questions. Read a portion of the chapter nightly and take notes. Return with questions the next day. Transfer the objectives into questions and see which ones you can answer. Ask questions about those you cannot answer. Consider NHS tutoring or getting a study buddy.
Level 1	No idea what the objective is. I recall what we did and some vague factual information but I have no idea how it is all related.	Afterschool remediation with teacher NHS tutoring and /or study buddy recommended in addition to the above suggestions!!

STEPS TO SUCCESS

- Be in class daily, on time, alert, & prepared.
- Be actively engaged: Take notes, ask and answer questions
- Do all assignments completely, honestly, & follow directions
 - Review notes, read the textbook and take notes
- Maintain an organized notebook so notes and assignments do not get misplaced
 - Having difficulty... ask for help!!
 - Absent? Get work and make it up promptly!
