

- A good strategy for doing well on all tests is for you to take the packet and re-type all the information/answers; even if you already wrote them down you need to do this.
- Then go back and highlight. After that go back with a red pen and write some notes for yourself, underline, put stars beside important facts, etc.

**KEEP
CALM
AND PUT ON
A HAPPY
FACE**

- **I guarantee this will help you!!!**

- You can also print up the PowerPoint - print it with 6 slides per a page so you don't use so much paper. Then go through the slides. Read them and highlight.
- Additionally, use colored flash cards to help you review. Separate different topics by color. Put information about each famous person on the pink cards. Put information about famous countries / regions/ empires on blue cards. Put vocabulary words on yellow cards. Put another topic, such as Catholic Church beliefs and requirements on the green cards. Remember – each person, vocab word, etc. needs its own card.
- **Doing all of this will build up your confidence and you will feel so much better about taking the test. It's a great way for the information to stay in your mind.**
