

1

1

the invention of writing the answer has to do with the
47

science of archeology, which uses a variety of different
48 techniques.

[2]

[1] As for very ancient remains of humans and their artifacts, scientists are on the ball about the surroundings
49 in which they are found. [2] In general, the lower something is in an archeological "dig," the older it is.

[3] Therefore, the more crudely something is made, the
50 older it is. [4] If human remains are found together with the bones of an animal that became extinct 50,000 years ago, we know that the remains are at least 50,000 years

old. [5] Any once-living thing, plant or animal, gives off
51 certain rays at a known rate for thousands of years after

its death. [6] Still another archeological technique is
51 radiocarbon dating. [7] By measuring its rays in a special machine, archeologists can estimate an objects age.
52

47. A. NO CHANGE
B. writing. The
C. writing? The
D. writing, the

48. F. NO CHANGE
G. different,
H. various
J. OMIT the word entirely.
